

My name is Emily and I am 9 years old. I wanted to join Lab_13 because I have a bursting passion for science which I would love to express, and I look up to my big brother Harvey who was on the committee a few years back. My favourite lesson is probably art, but science is a close second. Last year, me and my brother visited the careers convention in Birmingham and tested out a few experiments. My favourite experiment is trying to make water travel through tissue or a paper towel. I'm most excited to participate in the Science Week events next year. :-)

I am Finlay Morris and I am 9 years old my favourite lesson is Science. I wanted to join the science committee because I really want to help out with the things that the lab 13 does, like the lunchtime experiments on the playground called lunch_lab!

I am absolutely most excited to help with looking after the animals, mostly the snails because they look so slimy.

My name is Cheryl and at home I watch TV about experiments. I'm 9 years old, and I love science, I love going to my garden to look at the animals. I wanted to join the committee because science is fun. I do like playing with people outside but science is my passion. I am looking forwards to doing experiments and helping other people learn about science. In school I love to do AR, because it's relaxing and even do it at home lying in my bed. I was so excited when I was chosen for the Lab committee.

Our fourth new committee member has unfortunately been ill and will add his introduction on his return.
