As we have started a new year as the Lab_13 committee, we have redecorated the lab, using new posters. The committee have chosen the new posters for the lab and they look great. One is called the "Inventions through Time". It states Past and Present inventions and some that might come in the Future. It has every type of invention, from cars to swimsuits, it has everything!

About a year ago, Bulbs4Kids gave us some free bulbs. We planted them straight away, but then saved them after they flowered ready to plant again. Year 2 are now planting them for their "Throughout the year" project, seeing when they grow and when they don't grow. They will record all the information, watching to see how it takes all winter for the roots to grow, before the leaves and flowers start to grow in the spring. Some will be placed in a plastic bottle filled to the top, so we can see what goes on underground! The rest will be planted at the front of the school so everyone can enjoy the flowers in the spring.
